How to access the telemedicine service? >

How do I find my scheme number/access code? >

Can I register my family members for the service? >

Do I need a specific update to run this app on my phone? >

Your employer or insurer will be able to provide you with the correct access code. It's usually best to contact your HR team if your employer provides the service. If you have access to the service via a family member's insurance or employee benefits, then ask the policyholder for the access code.

ID Verifcation

Why do I need to verify my identity to use the service? >

How do I verify my identity? >

How do I provide proof of identity for a child? >

How do I know if I have parental responsibility of a child? >

How do I upload my documentation? >

How long will it take to verify the documents after I've uploaded them? >

We ask you to verify your identity because it helps us provide a safe and effective service. If we need to safeguard your wellbeing or react in an emergency situation, we need to be sure of your identity. The verification process also supports the transfer of information between Teladoc and other organisations like the NHS when you provide consent. It's also a regulatory requirement by the Care Quality Commission, who regulate health and social care services across the country.

ID Verification

Why do I need to verify my identity to use the service? >

How do I verify my identity? >

How do I provide proof of identity for a child? >

How do I know if I have parental responsibility of a child? >

How do I upload my documentation? >

How long will it take to verify the documents after I've uploaded them? >

When you register with the service or request an appointment, you will be prompted to complete ID verification either on screen or via a link we will send you so you can submit proof of your identity. You will need to:

- Upload a picture of a photo ID document, most commonly a passport or driving licence
- Upload a recent 'selfie' which we can compare to the picture on your photo ID

In most cases, you cannot access our healthcare services without verifying your identity first.

ID Verification

Why do I need to verify my identity to use the service?

How do I verify my identity?

How do I provide proof of identity for a child?

How do I know if I have parental responsibility of a child?

How do I upload my documentation?

How long will it take to verify the documents after I've uploaded them?

If you want to book an appointment for an eligible child, you will need to provide proof of parental responsibility for that child. We will contact you to request the relevant documentation. You must also have verified your own identity before the appointment can go ahead.

How do I verify my identity?

How do I provide proof of identity for a child?

How do I know if I have parental responsibility of a child?

How do I upload my documentation?

How long will it take to verify the documents after I've uploaded them?

Parental responsibility is a legal construct. If you're the child's birth mother or father, you will have legal parental responsibility over a child in the vast majority of cases (unless it's been removed). Adoptive parents also have parental responsibility for a child but step parents and family members who have not been legally granted guardianship over that child do not.

If you submit good quality photographs then the verification process won't take long. We use an automated checking service, which can return a result quickly. Our teams will pick up the result of your completed verification request and update your profile accordingly.

Can I request an appointment for an emergency condition? >

How can I request a GP appointment? >

What information do I need to provide at the point of booking? >

How does the GP call back service work? >

How do I prepare for a GP call back? >

How do video GP appointments work? >

How do I prepare for a video GP appointment? >

It's important to note that we do not provide an emergency service. If you're seriously unwell and experiencing a medical emergency, you should call 111, 999 or go straight to your nearest Accident and Emergency or urgent care centre.

Conditions we can't treat remotely include (but are not limited to):

- Chest pains
- Shortness of breath
- Severe abdominal pain
- Heavy bleeding
- Thoughts of suicide or self-harm
- Seizures
- Loss of consciousness/blackouts
- High fever in an infant

How do I prepare for a video GP appointment? >

Log in to your account and click on the 'Medical' link in the top menu. From the dropdown options that appear, select 'General Practitioner'.

From the following page, you can select from two options:

- Request Video Consultation – choose a scheduled appointment slot and speak with a doctor over video
- Speak to a GP – request a call back from a GP as soon as one is available

You can also request a call back by clicking 'GP Consultation' from the homepage when you first log in.

You will need to confirm your phone number (which we also collect at registration) and your location. We also ask you to provide a brief reason for your booking. This allows us to review your symptoms and ensure you don't need emergency intervention.

Finally, there's an option to upload a file. You can add documents which will help the doctor, such as a photo of a rash or injury, or evidence that you've been taking a particular medication if you're requesting a repeat.

One of our duty GPs will first review your appointment request to ensure you don't need urgent intervention. Your case will then pass into our call back list and a doctor will call your nominated telephone. We aim to call you back within 2 hours but during busy times, it may take longer.

As this is a call back service, you don't book a scheduled appointment slot so you need to make sure you have your phone nearby and are able to take a call in the hours that follow you booking. You should try to find a quiet space so you can speak privately and make sure that you have good phone signal.

We're a private service and not part of the NHS so our doctors cannot issue NHS prescriptions. This means you will pay the cost price of the medicine at your chosen pharmacy.

We offer an electronic prescription service via our partner Signature Rx. When the doctor issues a prescription, you receive a prescription code by SMS and email. You can take this code to any participating pharmacy at the time of your choosing to collect your medication. The pharmacist will log into the Signature Rx portal to check and dispense the prescription. Participating pharmacies include all branches of Boots, Lloyd's, Well and independent pharmacies.

We offer a delivery prescription service via our partner, Signature Pharmacy. They can take orders 8am-8pm 7 days a week. We recommend that patients use the delivery service where possible. Your GP will offer this option if you need a prescription.

If you live in London, you'll receive your medication on the same day as long as it's ordered by 3pm. Outside of London, Signature will deliver your medication the next day if it's ordered by 1pm.

If you prefer to collect your prescription from a specific pharmacy, we can accommodate your request on most occasions. We will contact your preferred pharmacy to ensure they have the medication in stock and confirm contact details before sending it through.

Please note that it can be difficult to get through to pharmacies during busy periods, which can cause delays.

Some medications are not suitable for prescribing via an online clinical service. These include controlled drugs like diazepam, strong painkillers, sleeping pills and drugs that require close monitoring through a regular GP.

As we don't have access to your NHS GP notes and history, we need to be careful about what we prescribe. In some circumstances, we may need to ask you for additional information before we can issue a prescription. Our GPs will only prescribe medication, including antibiotics, if they can do so safely.

We are not a replacement for your regular or NHS GP and do not have access to your complete medical history. For those reasons, we can't issue ongoing repeat prescriptions for long term conditions. These are much better managed by your regular doctor who can examine you in person.

We may be able to issue a single prescription for some conditions. If you want to request a short term course of a repeat medication, please upload photographic evidence that you have been prescribed that medication before when you book your appointment.

How do specialist referrals work?

Is there a charge for a specialist referral?

Can I have more than one specialist referral?

You can request a specialist referral during your GP consultation. Our clinicians will find out more about your condition and issue a referral when it is clinically indicated. The referral letter can be emailed to you when your consultation notes have been completed by the GP - typically within two hours.

As a private service, we only issue private, open referrals and do not refer into the NHS. If you have medical insurance you should contact your insurer to find out the next steps. If you do not have insurance, you will be charged by the specialist for the appointment and any investigations they may recommend.

Sick Notes

- How do sick notes work? >
- What is the maximum time I can be signed off for? >
- Can I get a fit note? >

You can request a sick note during your GP consultation. The sick note can be emailed to you when your consultation notes have been completed by the GP – typically within two hours.

Sick notes are issued at the discretion of the consulting GP and only when clinically appropriate. There is no charge for issuing a sick note.

Complaints & Feedback

Sick Notes

- How do sick notes work? >
- What is the maximum time I can be signed off for? >
- Can I get a fit note? >

We do not offer fit notes. Fit notes are to certify a patient is fit enough to carry out a given activity, e.g. return to work, fly, run the marathon. This often requires an in-person examination and is best done by the NHS GP.
